

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method comprising:
 - providing a first computer system with associated user access, the first computer system including bookmarks;
 - providing a second computer system including a search engine;
 - providing a ~~user~~ remote computer system with associated user access,each of the computer systems being interconnected via a communications network;
 - a user selecting an indicator to cause the search engine to search websites associated with the bookmarks;
 - a user inputting a search term into the ~~user~~ remote computer system that specifies ~~any~~ that websites associated with the bookmarks are to be searched;
 - the search engine receiving the search term and accessing the bookmarks to obtain identifiers for the websites associated with the bookmarks and providing search results to the ~~user~~ remote computer system; and
 - providing a user interface of a web browser to allow users to access the search engine, the web browser to be run on either of the first and the remote computer systems for:
 - inputting a search term to cause the search engine to perform a search using the search term;
 - making a selection to cause websites associated with the user's bookmarks to be searched; and
 - making a selection to cause websites associated with bookmarks stored on the remote computer system to be searched; and
 - ~~the user~~ remote computer system displaying the search results.

2. (Currently Amended) The method of claim 1, further comprising:
~~the search engine providing results of the searching to the user~~ inputting
an identifier of the remote computer system.
3. (Previously Presented) The method of claim 1, further comprising:
using a uniform resource locator (URL) to access the websites.
4. (Cancelled).
5. (Cancelled).
6. (Cancelled).
7. (Cancelled).
8. (Cancelled).
9. (Cancelled).
10. (Cancelled).
11. (Cancelled).
12. (Cancelled).
13. (Cancelled).

14. (Cancelled).
15. (Cancelled).
16. (Cancelled).
17. (Cancelled).
18. (Cancelled).
19. (Cancelled).
20. (Cancelled).
21. (Cancelled).
22. (Cancelled).
23. (New) The method of claim 1 further comprising:
 - the search engine, executing on the second computer system, receiving the search term and at least one identifier associated with bookmarks from the first computer system;
 - the search engine searching a database using the search term;
 - the search engine searching websites associated with the bookmarks; and
 - the search engine providing the results of searching the database and the websites to the first computer system.

24. (New) The method of claim 1 further comprising:
the search engine identifying the second computer system from the remote computer system.
25. (New) The method of claim 1 further comprising:
the search engine causing the bookmarks on the first computer system to be accessed so that the search engine receives the identifiers associated with the bookmarks.
26. (New) The method of claim 25 further comprising:
the search engine providing an advertisement to be displayed on the second computer system.
27. (New) The method of claim 26 further comprising:
the search engine using the search term and information from the identifiers to select the advertisement to be provided to a user.
